(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-26 are rejected under 35 U.S.C. 102(e) as being anticipated by Sawada et al. (Sawada), U.S. Patent Pub. No. 6,909,902.

Regarding claims 1-26, Sawada discloses an information handling system for providing directions to a wireless unit for improving reception, comprising: logic for determining a target location for improved communication for the wireless unit based in part on information representing a recent position of the wireless unit, wherein the target location is more likely to result in better reception and transmission of wireless signals to and from a wireless access point (col. 4, lines 15-65 and col. 11, lines 5-67).
